Gary,

Unless it was under contract with TCEQ, the BPCP did not do facility inspections and a site that small would not have been on their list. To my knowledge TCEQ did not do their first inspection their until after we had over 100 complaints and CES was getting unwelcome interest from the media.

I was looking for actual facility inspections. I should have the complaint driven stuff.

Thanks

Subject: RE: COH Inspections

Gary,

Our investigations at CES were all complaint driven and we did not get our first complaint about CES until October of 2005 and it was a full year, and 7 more complaints, before we confirmed a complaint there in October of 2006. The number of complaints rose rapidly as CES expanded their tank cleaning operation and began getting into oil recovery operations. I've sent this information before along with several table updates, if you need it again I will ask Nguyen Ly to update it with the surveillance done over the last few months which was not complaint driven.

Subject: CES: COH Inspections

Don:

Do you have a summary of inspections of CES from when it began operations in 2002?

I wanted to find out the date of inspection, the inspection results, regulatory action taken, achieved result, if any.

I got a question from one of the residents and I told her that I would ask TCEQ, EPA, and COH

Thanks
